

'BackStreet' Mini-bike

(661) 714-7810

This custom Mini-bike was created by Ron Dimmitt of 'BackStreet Mini-bikes'. Ron's company makes all kinds of custom mini-bikes and go karts.

This mini-bike is made with 1-inch tubing. It has a black powder-coated frame, fork, engine cover, and gas tank. It is equipped with a new 6.5 horsepower engine, with a "max-torque" clutch. It rides on 6" x 4" studded tires, mounted on aluminum rims. Stopping power is provided by an internal expanding rear brake. Enjoy sitting on or looking at the custom pleated vinyl seat, and rest your feet on folding foot-pegs. There is a kill switch for the faint of heart!

This mini-bike is large enough for a big kid (adult) to ride!

How can you get one? This mini-bike can be yours for only \$5.00. We are raffling this mini-bike at the LAPD "VTAC" Car Show, Saturday, June 5th at the Warner Center Park in Woodland Hills, Ca.

No auto repair necessary to participate. Just visit any of our 7 Leon's Transmission locations and purchase a \$5.00 raffle ticket for this mini-bike.

The drawing will take place at the end of this car show. You do not need to be present to win.

All proceeds go to the LAPD Valley Traffic Ad Council, working to keep people safe on the streets of Los Angeles.

If you attend the car show, be sure to stop by the Leon's Transmission booth to see all the cool items from the Murphy Auto Museum, located in Oxnard. You can also win other prizes at the show.

See you there!
